

Setting a Mood and Recording with Scribe

1 Navigate to 127.0.0.1:5500/index.html (localhost)

2 This is the front-end part of the app. Fill the text box and click "Set Mood". This will write data to the Ethereum Goerli Testnet.

This is my dApp!

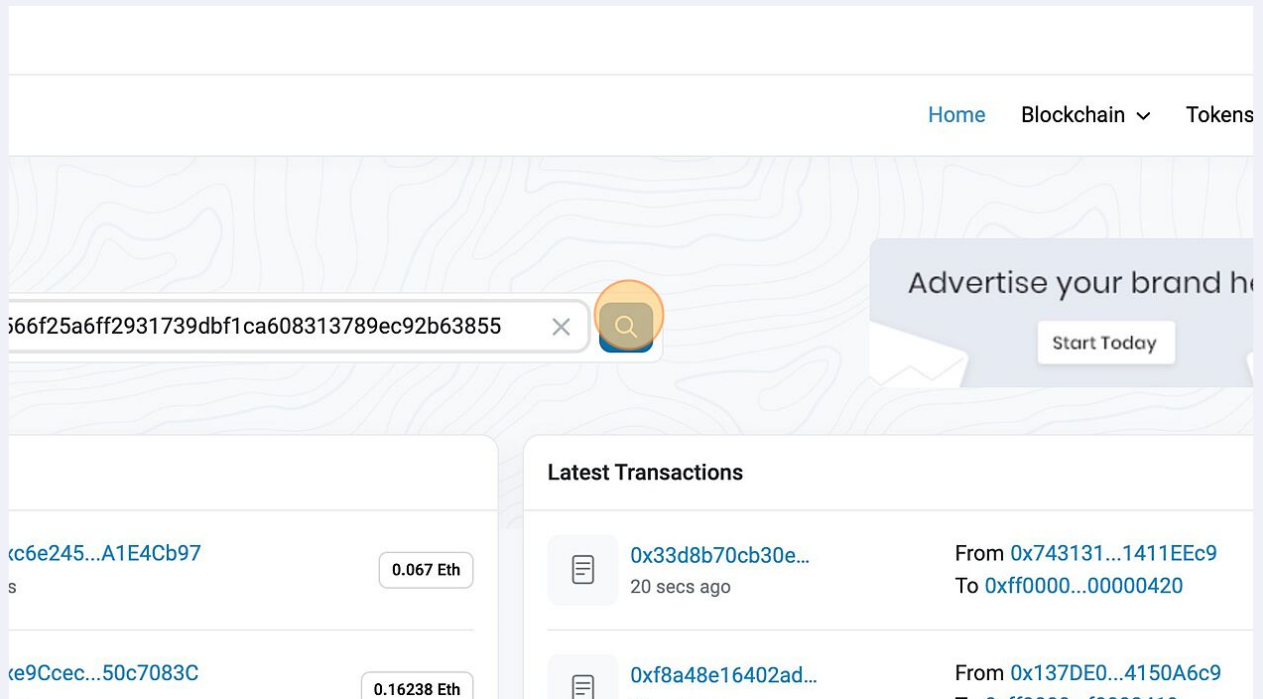

Here we can get or set the mood:

Input mood:

3 You will now be redirected to your MetaMask page, where you must confirm your transaction.

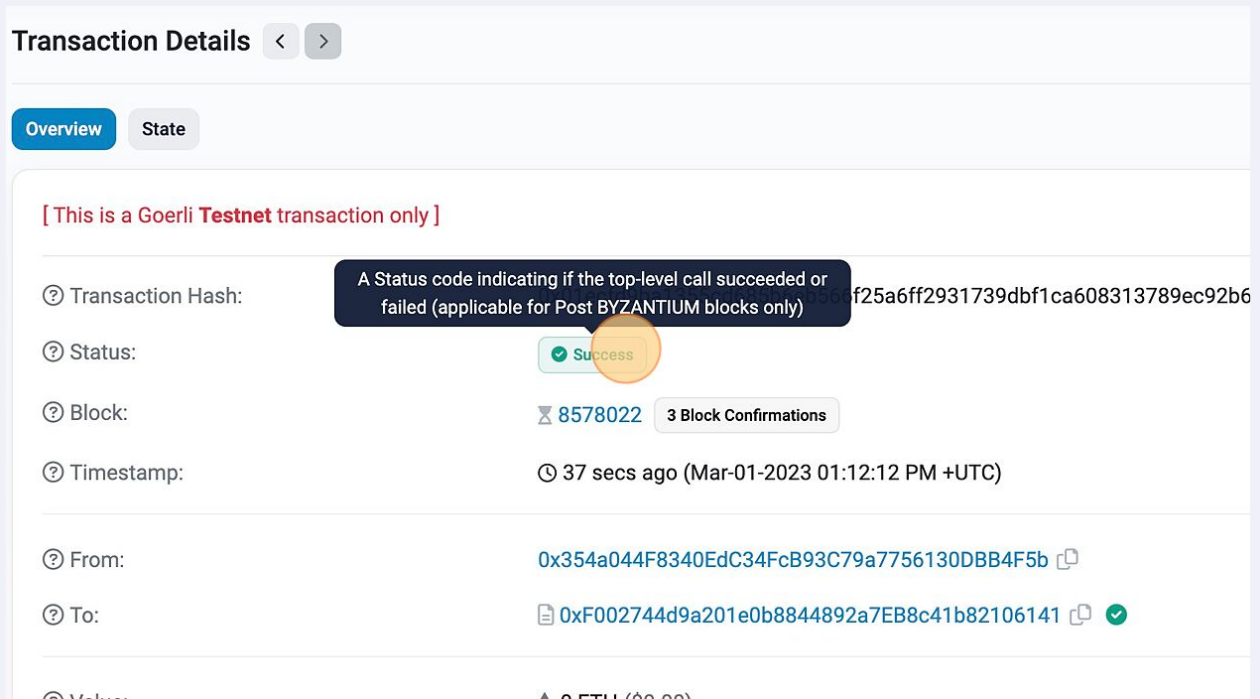

4

Copy the transaction hash and paste it in the goerli.etherscan.io website to see the status of your transaction

5

Once the status changes to "Success", you can go back to the webpage and retrieve info.

6

Click "Get Mood" to see your last given input.

Here we can get or set the mood:

Input mood:

Happy!!

Get Mood

Set Mood

Your Mood: Happy!!
